

## ABSTRACT

Disclosed is a system to integrate a defined contribution health plan with a traditional health plan that includes a claim processing system, a health plan management software module, and a defined contribution management software module integrated with the health plan management software module. Both the health plan management and defined contribution software modules are operable by the claim processing system to: create a defined contribution application for the health plan to allow for the entry of information for the defined contribution plan; link defined contribution plan information to the health plan; and establish allocation rules and amounts for the defined contribution plan. As part of claim processing, a claim payment to a member or provider based on the defined contribution plan may be made.
